WEDNESDAY, DECEMBER 1, 1920.

Nation-1 Tax Revision at Once.

wait for March 4 to begin the needed revision of the revenue law, but should pitch in next week. The days will be few between early December call the special session of the new to the whole Republican programme. But there is always time enough to

intimately familiar with all the de- as Captain Mahan. done in the way of revenue leg- defensive or offensive warfare. Islation, whatever they can do-and ments must be made out will be a godsend to the American public.

of the country's economic condition and so deep a study and so careful a framing of the schedules which will be anti-chemical restriction. required to leave American industry safe and yet not kill imports and thereby dry up customs revenues, that we should be lucky to have a measure anywhere as good as Dingley or Alparch could make inside of a full year. This is the very reason Congress should give us what else it can within three months.

The Treasury can't wait on distant tariff revenues to pay bills that are knocking at the door. American business can't wait to be relieved of restrictions and hurdons that are throttling production and distribution. American wage earners can't wait when their bread and butter depends upon work which itself depends upon the productive machinery of the nation running full speed.

Let the country get all the help that can be given it now. Then give it the rest as fully and as soon as possible.

Martyrs to the X-Ray.

The death of Dr. CHARLES INFROIT. a well known French surgeon and one of the most distinguished X-ray specialists, was reported yesterday from Paris. He died, like many men before him who devoted their lives to the study of the mysterious rays discovered by Dr. Röntgen, a victim of his own zealous efforts to reveal the secrets of this strange agency and to convert it into a safe and usable

power for mankind. Ever since their discovery the full scientific value and power of the Röntgen rays have puzzled scientists. To the man who made them the subject of special study they were pecu-Harly fascinating. His researches as attitude on the proposal to ban as and unequal distribution of supply. often proved that much which had uncivilized this particular method of The hindrance to distribution some been accepted regarding their power warfare we have as of record the months ago was a combination of was not borne out by careful and somewhat curious result here noted; tight credit and shortage of transporthorough experiments as they re- Austria-Hungary signed and ratified tation. Germany was among the Powers signing and ratifying the

> The reasons which impelled the United States to stand aloof from the rest of the nations represented at The Hague in regard to the use of poisonous gases were stated very concisety by Captain Mahan to the sub-committee considering the subject. They are worth reproducing now: "I. That no shell emitting such

gases is as yet in practical use or has undergone adequate experiment : consequently, a vote taken now would be taken in ignorance of the acts as to whether the results would be of a decisive character, or whether injury in excess of that necessary to attain the end of warfare, of immediately disabiling the enemy, would be inflicted.

"2. That the represent of cruelty and perfidy addressed against these supposed shells was equally uttered formerly against firearms and torpedces, although each are now employed without scruple. Until we know the effects of such asphyxiating shells, there was no saying whether they would be more or less merciful

than missiles now permitted. "3. That it was filogical and not demonstrably humans to be tender about asphyxlating men with gas when all were prepared to admit that it was allowable to blow the bottom out of an irenclad at midnight, throwing four or five hundred men into the sea to be choked by water, with scarcely the remotest chance of escape. If, and when, a shell emitting asphyxiating gases has been successfully produced, then, and not before, will men be able to vote intelligently on the subject."

In consequence of Captain Mahan's

It w'll be a difficult task to pass the appropriation bills. Even if this were not so Republican majorities in this Congress are not sufficient to permit a free gress are not sufficient to permit a free Republican hand as they will be in the

An Investigation of the City Government Called For by Taxpayers.

To The New York Heralds What we need is a big cleaning up, starting at the city Hall; then a long visit at Fourteenth street, where the gentlemen who carve the pork are eating most of it themselves and hiding the rest of it in the wigwam; then a real long visit as the carries and hiding the rest of it in the wigwam; then a real long visit as the carries and hiding the rest of it in the wigwam; then a real long visit as the carries of the passage of "popsun" tax bills. By the passage of "popsun" or specific tax bill's the revenues could be increased measurably. For instance, it might be

CENTRAL JAIL CONTROL URGED IN BAY STATE Plan in Keeping With Platform Pledges.

Bosron, Nov. 30.—Prediction that a reorganization of the penal institutions of the State which would place the administrations of county Jails under a central State department instead of County Commissioners as at present, was made by Representative S. Loring Young at the annual conference of Probation Officers at the State House today. Representative Young, who is a candidate for Speaker of the House, argued that to maintain an equal standard in the correctional institutions throughout the State they should be under central control.

He pointed out that the Republican

ing standards by fourteen different counties, should be consolidated and hereafter managed by the State." The study of the feebleminded and de-The study of the feebleminded and de-sinquents for the discovery of "psycho-ogical factors" before putting down an

offender as a criminal was utged by Dr. C. McAfie Campbell of the Boston Psychopathic Hospital.

"The chief distinction," he said, "between criminals and non-criminals is that the latter are merely uncaught."

DARTMOUTH INCREASES TUITION FEE TO \$250

Effective Next September-Scholarships Adjusted. Special Despatch to THE NEW YORK HERALD.

HANOVER, N. H., Nov. 20.—Beginning next September the annual fee for tuition at Dartmouth College will be \$250, according to an announcement made by the college authorities to-day. This is an increase of \$50 a year over the present rate and is found necessary, it

is explained, on account of the in-creased costs of operation.

With that increase the tuition fee will equal approximately 50 per cent.
of the annual cost per man of operation of the college somewhere in excess of of the college somewhere in excess of \$500.

At the same time a change will be made in the scale of scholarship rates in order that the students dependent upon such ald may not be obliged to meet an increase out of proportion to their ability to pay.
